Tutoring Experience

For the past 9 years, I've had the pleasure of working with students from international schools across Europe and beyond. My focus has always been on breaking down difficult biological concepts into manageable lessons, helping students prepare for major exams like IB and IGCSE.

In addition to school-level tutoring, I've guided students through detailed coursework and assignments, making sure they understand and apply key principles. Many of my students have gone on to study at top universities, and it's been rewarding to see their growth and success in biology.
